Voter: *Charles Ng'ethe*

Comment Type: *Editorial* (as designated by Voter)

Comment: *The PDF I downloaded had so many cancellations and repeated numbers which run from 1 to 65 for each page.*

Suggested Remedy: *Please provide a document that is clear without cancellations or empty pages which imply there is some missing information.*

Decision of Group: *Accepted-Modified*

Resolution of Group:

Delete empty page ii, or mark "This page intentionally left blank."

Set line numbers (1-65 on left column) in color to indicate that they are temporary.

Reason for Recommendation:

Line numbers must remain in draft for commenting purposes, but will not be in published standard.

The "cancellations" must remain, since they are a fundamental part of the standard. This standard is an amendment to IEEE Standard 802.16 The marks are used to indicate changes to that standard. This is explained in "Editorial instructions" on Page 5. This editorial procedure is required by IEEE-SA.

Formal Email Response of Voter to Resolution:

None. Did not participate in recirculation.

Informal Email Response of Voter to Resolution:

Dear Dr. Marks.

Thanks for your clarification. However I do not have any problems with the contents.

For us third world Engineers we have alot of time to scrutinise and study the standards. Work is too routine and easy leaving us with alot of idle time. We only implement/maintain networks designed from the 1st world It's always a priviledge to read upcoming standards and be part of the technology development.

thanks

Ng'ethe

P802.16c Amendment to IEEE Standard for Local and Metropolitan Area Networks - Part 16: Air Interface for Fixed Broadband Wireless Access Systems - Detailed System Profiles for 10-66 GHz

Dear Paul:

I am pleased to inform you that on 9 May 2002 the IEEE-SA Standards Board approved the above referenced projects until December 2004 and December 2006, respectively. Copies of the files are attached in .pdf format.

Now that your projects have been approved, please forward a roster of participants involved in the development of these projects. This request is in accordance with the IEEE-SA Operations Manual, Clause 5.1.2f under *Duties of the Sponsor* which states:

"Submit annually to the IEEE Standards Department an electronic roster of individuals participating on standards projects"

Attached is an Excel spreadsheet for your convenience. Please forward these lists to me via e-mail at j.haasz@ieee.org no later than 1 August 2002.

At the bottom of this e-mail, please find URLs which you may find useful in the development of your proposed standard and in submitting your final draft for approval. We strongly recommend that a copy of your draft be sent to this office for review prior to the final voting by the working group to allow for a quick review by the editorial staff before sponsor balloting.

If you should have any further questions or would like to receive this information in paper, please contact me at 732-562-6367 or by email at j.haasz@ieee.org.

Sincerely,

Jodi Haasz

MEMO

TO: 802.16 Working Group
 FROM: Jennifer Longman
 DATE: 20 August 2002
 RE: Editorial Review of P802.16c/D3

Upon review of P802.16c/D3, I have the following comments:

1. The information now contained in the Scope and Purpose should be removed and added to the EDITORIAL NOTE. No new information should be added to the Scope and Purpose, unless you are specifically modifying those clauses in the base standard.

The following is an example of from 802.1t-2001:

EDITORIAL NOTE—This amendment to IEEE Std 802.1D, 1998 Edition (ISO/IEC 15802-3:1998) defines the changes necessary in order to address maintenance items that have been brought to the attention of the 802.1 Working Group. These changes are defined as a series of additions to, and modifications of, the existing text of ISO/IEC 15802-3:1998; this supplement therefore assumes all material, including references, abbreviations, definitions, procedures, services and protocols defined in the base text. Text shown in **bold italics** in this amendment defines the editing instructions necessary in order to incorporate the modifications and additions into the base text. Three editing instructions are used: **change**, **delete**, and **insert**. **Change** is used to make a change to existing material. The editing instruction specifies the location of the change and describes what is being changed either by using strikethrough to remove old material or underline to add new material. **Delete** removes existing material. **Insert** adds new material without changing the existing material. Insertions may require renumbering. If so, renumbering instructions are given in the editing instruction. Editorial notes will not be carried over into future editions of IEEE Std 802.1D.

The following is an example from 802.11d-2001 showing a slightly different style:

[This amendment is based on the current edition of IEEE Std 802.11, 1999 Edition and the IEEE Std 802.11a-1999 and IEEE Std 802.11b-1999 amendments.]

NOTE—The editing instructions contained in this amendment define how to merge the material contained herein into the existing base standard to form the new comprehensive standard as created by the addition of IEEE Std 802.11-1999.

The editing instructions are shown in **bold italic**. Three editing instructions are used: change, delete, and insert. **Change** is used to make small corrections in existing text or tables. The editing instruction specifies the location of the change and describes what is being changed either by using strikethrough (to remove old material) or underline (to add new material). **Delete** removes existing material. **Insert** adds new material without disturbing the existing material. Insertions may require renumbering. If so, renumbering instructions are given in the editing instruction. Editorial notes will not be carried over into future editions.

If you have any questions, please do not hesitate to contact me at any time.

Best regards,

Jennifer Longman
