11 April 2006

Dear P802.16-Conformance04 Balloting Group:

Thank you for your participation in the Sponsor Ballot of P802.16-Conformance04, which ran from 3 February to 8 March 2006. The results, in summary, were 113 Approve, 5 Disapprove, and 10 Abstain. The ballot met the numerical conditions for approval.

The IEEE 802.16 Working Group met on 6-9 March 2006 to address the comments received. Two of the Disapprove voters were in attendance, and both agreed to convert their vote to Approve based on the comment resolutions. Of the three remaining Disapprove voters, who did not attend:

- Pieter-Paul Giesberts submitted 9 comments, but none were marked “Must Be Satisfied”.
- Rainer Ullman marked 2 comments, both Technical, as “Must Be Satisfied” (comments 7 and 8).
- Manikantan Srinivasan marked 21 comments, all Editorial, as “Must Be Satisfied” (comments 10, 11, 21, 24, 25, 26, 41, 42, 43, 44, 45, 46, 47, 51, 52, 53, 55, 56, 57, 58, and 62).

The Working Group agreed with each the remaining “Must Be Satisfied” comments with the exception of Comment 7, with which it agreed in principle and proposed a resolution.

We are requesting that the IEEE Balloting Center initiate a fifteen-day recirculation of the new draft P802.16-Conformance04/D7 (file *P80216-Conf04\_D7.pdf*).

Please take this opportunity to review the material. Since this is a recirculation ballot, you need respond only if you wish to change your initial vote. If you do not respond to this recirculation ballot, your last vote will be carried forward. Also, as this is a recirculation ballot, a change to “do not approve” (i.e., a negative vote) with comments shall be based only on the changed portions of the balloted document, clauses affected by the changes, or portions of the balloted document that are the subject of the unresolved negative votes.

If you have voted Disapprove, I urge you to review the comment resolutions and let us know which, if any, of your comments have been satisfactorily resolved. If you choose to cast an Approve vote, we will assume that all of them are resolved to your satisfaction.

Sincerely,

Roger Marks  
Chair, IEEE 802.16 Working Group on Broadband Wireless Access
