Roger B. Marks
Chair, IEEE 802.16 Working Group
r.b.marks@ieee.org
7 April 2009

Dear P802.16h Balloting Group:

Thank you for your participation in the recirculation of P802.16h/D8, which ran from 4-25 December 2008. Prior to comment resolution, the numerical results were 94 Approve, 12 Disapprove with Comment, and 4 Abstain. This satisfies the numerical conditions for approval. These numbers do not consider any possible changes in vote as a result of comment resolution.

Comments were resolved by the IEEE 802.16 Working Group during its Sessions #59 and #60 in January and March. We have uploaded the resolutions to the IEEE-SA myBallot system. We have posted the full documentation regarding the resolution of these comments, along with the editor's implementation notes, in the document IEEE 802.16-08/065r5 at http://ieee802.org/16/docs/#08_065; here the myBallot comments are numbered A1-A216, corresponding to the myBallot numbers, and additional comments submitted directly to the Working Group are numbered A20001-A20006. Based on these comments, an interim draft P802.16h/D8a (included in the ballot package, for your reference) was produced, and further internal Working Group comments were resolved, as documented in IEEE 802.16-09/0012r2 at http://ieee802.org/16/docs/#09_0012. Comment submitted directly to the Working Group are not associated with a Disapprove vote. Note that some comment resolutions refer to documents contributed directly to the 802.16 Working Group. These are available at <http://ieee802.org/16/le#contrib>.

We are requesting that the IEEE Balloting Center initiate a recirculation of the new draft P802.16h/D9. For your reference, we are also including file *P80216h_D9deltaD8.pdf* indicating the changes with respect to draft D8. As an additional reference, we are providing the draft P802.16Rev2/D9a, which is intended as the baseline for 802.16h to amend. This document is not an approved IEEE standard, but it has concluded a separate Sponsor Ballot and been submitted to RevCom.

Please take this opportunity to review the material. Since this is a recirculation ballot, you need respond only if you wish to change your initial vote or submit additional comments within scope of the recirculation. No comment will be considered as a valid element of a Disapprove vote unless the voter enters it into the myBallot database and designates is appropriately.

If you have voted Disapprove, I urge you to review the comment resolutions and let us know which, if any, of your comments have been satisfactorily resolved. If you choose to cast an Approve vote, we will assume that all of them are resolved to your satisfaction.

Sincerely,

Roger Marks
Chair, IEEE 802.16 Working Group on Broadband Wireless Access
