Re:	IEEE 802.161-00/15 < http://ieee802.org/16/liaison/docs/802161-00_15.pdf >	
Abstract	This letter acknowledges an ETSI TM4 liaison letter and provides additional information.	
Purpose		
Notice	This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.	
Release	The contributor grants a free, irrevocable license to the IEEE to incorporate text contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.	
Patent Policy and Procedures	<p>The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures (Version 1.0) <http://ieee802.org/16/ipr/patents/policy.html>, including the statement "IEEE standards may include the known use of patent(s), including patent applications, if there is technical justification in the opinion of the standards-developing committee and provided the IEEE receives assurance from the patent holder that it will license applicants under reasonable terms and conditions for the purpose of implementing the standard."</p> <p>Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <mailto:r.b.marks@ieee.org> as early as possible, in written or electronic form, of any patents (granted or under application) that may cover technology that is under consideration by or has been approved by IEEE 802.16. The Chair will disclose this notification via the IEEE 802.16 web site <http://ieee802.org/16/ipr/patents/letters>.</p>

13 July 2000

Dr. Roberto Macchi
Chairman ETSI WG-TM4
<mailto:roberto.macchi@icn.siemens.it>

Dear Dr. Macchi,

On behalf of IEEE 802.16, I thank ETSI WG-TM4 for the Liaison Letter [TM4(00)23_03Annex06] of 23 June and for the interesting explanations offered by Barry Lewis.

We have had two comprehensive presentations on the TM4 works, done by our Liaison Officer, Marianna Goldhammer. The TM4 works were extensively presented to the 802.16.2 Coexistence group and to the 802.16.3 **Task Group**.

Both groups expressed their high level of interest in the following TM4 working documents:

1. Output documents, WP2:

- Annex 07-TDD study final document(TM-4087)
- Annex 09-TM-4099 final document
- Annex 13-TM-4106 final output(part 3 to rev.EN301 213) including corrections
- Annex 14-TM-4110 final output rev. to EN301021
- Annex 18 and 19- New work item to add MP-MP option to EN301 213 part 1.

2. New work items:

- PMP technical report on cross-compatibility NFD values
- Steerable antenna – DTR//TM 4115
- 32GHz antenna – DEN/TM 4057-4.

3. Other documents

- 26GHz general part – EN 301 213-1
- Conformance testing – EN 301 126.

We would appreciate if our Liaison Officer would be permitted to transfer to us the relevant documents. This would help us provide the desired global applicability for our standards.

Significant progress has been made in the development of the 802.16.2 coexistence document. It will be sufficiently complete and stable by October. Therefore the 802.16.2 coexistence task group plans to forward a copy of the current draft version of the Recommended Practices for Coexistence document to ETSI TM4 in October 2000.

2000-07-13

IEEE 802.16l-00/20

Best regards,

Roger B. Marks
