1. Overall Description:

3GPP TSG-SA WG5 thanks 3GPP2 TSG-S WG5 for copying it on its liaison regarding the establishment of a liaison with IEEE 802.16 NETMAN Task Group.

3GPP TSG-SA WG5 endorses such a liaison and also requests IEEE 802.16 NETMAN Task Group to consider the establishment of a similar liaison with 3GPP TSG-SA WG5, the purpose of a liaison relationship would be for the same reason, i.e. *to exchange information related to the development of network management specifications for heterogeneous networks.*

3GPP TSG-SA WG5 has over the last number of years established a generic & flexible, protocol neutral methodology for application to network management interfaces. This methodology adopted also by 3GPP2 might be of interest to IEEE 802.16 NETMAN group.

3GPP TSG-SA WG5 would appreciate kind consideration of this request by IEEE 802.16.

2. Actions:

To IEEE 802.16 NETMAN Task Group

ACTION: 3GPP TSG-SA WG5 would appreciate kind consideration of its request to establish a liaison relationship.
