Subject: Numbering in Revision 2 of IEEE 802.16 standard

Date: 11 July 2007

Dear Roger,

We would like to bring to your attention that there are number of changes inclusive of clause, figure and table numbering in document P802.16TMRev2/D0a (May 2007) relative to the IEEE 802.16e-2005 standard.

This is of concern to us, as it creates problems to all of the common ETSI-WiMAX Testing documents which refer to clauses, figures and tables according to the numbering used in the previous version of the standard.

We would suggest to minimize the number of such changes and to consider alternative solutions for similar future projects in order to avoid adverse impact on testing documents.

Yours faithfully,

Bernd Friedrichs

Chairman ETSI TC BRAN
