

WORKING PARTY 8F

Liaison statement to external organisations on minimum performance requirements and evaluation guidelines for IMT-Advanced

Source: Document 8F/TEMP/578

WP 8F plans to issue an invitation to receive proposals for candidate Radio Interface Technologies (RIT) for IMT-Advanced in early 2008. A part of this invitation will contain the “Requirements Related to Technical System Performance” [IMT.TECH] while another part will contain the “Guidelines for Evaluation” [IMT.EVAL] of candidate RITs for IMT-Advanced.

These draft documents are attached electronically for your review. WP 8F would appreciate receiving your comments and feedback in time for its next meeting in January 2008.

WP 8F plans to continue discussing the technical system performance requirements as well as the guidelines for evaluation at its next meeting.

WP 8F looks forward to receiving the requested information and/or comments from external organisations and on-going co-operation.
