

TELECOMMUNICATIONS TECHNOLOGY ASSOCIATION

To: Roger B. Marks, Chair, IEEE 802.16
From: Chung G. Kang, Chair, TTA PG702
Date: MMM DDD, 2008
Reference: None

Dear Dr. Roger B. Marks,

The purpose of this liaison letter is two folds. The first one is to give IEEE 802.16 an update on the progress of standardization in TTA PG702, Korea. The other one is to move forward relationship between two groups in our future collaboration.

In the course of restructuring the standardization committees of TTA at the end of last year, 2.3GHz Portable Internet Project Group (PG302) has been renamed as IMT WiBro Project Group (PG702).

Also, TTA PG702 chairmanship was elected newly as follows, and then I hope to advance our opportunities for alignment through our new PG702 chairmanship.

Chair

Chung G. Kang, Korea University

Vice Chair

Dong Seung Kwon, ETRI

Hyung Kim, KT

Jung Je Son, Samsung Electronics

Liaison officer to IEEE 802.16

Jung Je Son, Samsung Electronics

As I mentioned earlier regarding TTA PG702, WiBro Standard had reached full alignment between WiBro Standards and a subset of the P802.16-2004/P802.16e-2005. Moreover, TTA PG702 has a plan to develop standards reaching full harmonization with IEEE 802.16m for IMT-Advanced of ITU-R and IEEE 802.16/REV2 for the revision of WiBro standard.

Meanwhile, at this time, we would like to seek permission from you to adopt some materials from IEEE 802.16 such as P802.16REV/2, EMD/SRD/SDD of TGM and so on. If there is any particular formality to deal with issue, please let us know it. Meanwhile, the many members of TTA PG702 will be participating in

the future IEEE 802.16 sessions for our collaboration continuously.

I hope this letter is useful for you to understand the new TTA PG702 status and I believe we can provide more information in the future.

Yours sincerely,

Chung G. Kang , Chair, TTA PG702
