

IEEE 802.16 Session 43

May 8-11, 2006

Tel-Aviv, Israel

TGC Conformance

Herbert Ruck

Status of TGC Conformance

- **Created new version P802.16/Conformance04_D7**
- **Re-circulated the sponsor ballot in April-May 2006**
- **Called 2-3 people with NO votes to switch to YES**
- **One minor issue to deal with.**
- **If resolved without text change then no re-circulation is needed and we are finished.**

This week

- TGC meeting today Monday, May 8, 2006 from 3-5 PM
- Room ?
- Re-visit one comment #7 about support of services in 802.16-2004
 - We discussed this at session 42 in Denver (decided that all services are optional in 802.16-2004)
 - Apparently we did not write down the reason for the decision of the group
 - In the mean-time the commenter has changed to editorial (so that it will be easier to resolve)
 - question is if we should add a note ("At least one of the above scheduling services must be supported.") or not?

Closing plenary

We expect to have a motion for the closing plenary to approve the resolution of the group
