

# **IEEE 802.16 Session 43**

**May 11, 2006**

**Tel-Aviv, Israel**

**TGC Conformance**

**Herbert Ruck**

# **Actions of TGC Conformance**

- **According to the discussions at the opening plenary we added further explanations on the resolution of comment nr. 7 in the database IEEE 802.16-06/015r2 and created the database IEEE 802.16-06/015r3**

# Reason for Resolution

- **After reviewing the e-mail of May 3rd, the ballot resolution committee reaffirms the decision from IEEE 802.16 Session #42, namely that the 802.16-2004 standard does not explicitly mandate the support of the services and they are therefore listed as optional in the PICS.**
- **Adding the note requested in the e-mail would be equivalent to adding normative text that again is not supported by the standard. The decision is therefore to leave the text as is in P802.16/Conformance04\_D7 that was recirculated after the sponsor ballot.**

# Motion

- **Accept the database IEEE 802.16-06/015r3 as the final resolution of the sponsor ballot comments for P802.16-Conformance04/D7.**

# Conclusion

- **Resolved all comments**
- **Voting tally is 100% approve**
- **No changes to P802.16/Conformance04/D7**
- **No need for recirculation**
- **Ready to be submitted to RevCom**
